ABOUT JPS DIGITAL SOLUTIONS

# A digital growth partner for your organic visibility

JPS Digital Solutions is a Jaipur-based digital marketing agency that helps businesses worldwide strengthen their online presence through search. We bring together technical website improvements, relevant content, keyword targeting, quality backlinks, search intent optimization and emerging AI search optimization in one structured, transparent plan.

Our aim is practical: improve organic search visibility, website health, relevant traffic and brand authority so your website is better placed to attract qualified business opportunities over time.

> We explain what we are doing, why we are doing it, and what the data shows — in plain language.

**1 Data-driven SEO strategy**

Decisions based on audit findings and search data, not guesswork.

**2 Website health & performance**

Crawlability, indexing, speed and mobile usability.

**3 Search intent & keyword relevance**

Pages matched to what your customers really search for.

**4 Content quality & topical authority**

Useful, accurate content that covers topics in depth.

**5 Ethical, relevant link acquisition**

Legitimate outreach and relevant placements only.

**6 Google search visibility**

Stronger positioning for relevant queries on target pages.

**7 AI-powered search discovery**

Content structured for answer-led and generative search.

**8 Transparent reporting**

Regular reports on work done and progress measured.

HOW OUR APPROACH FITS TOGETHER

**1 Foundation**

Technical health & accessibility

**2 Relevance**

Keywords, intent & content

**3 Authority**

Relevant links & brand references

**4 Discoverability**

Google + AI search experiences

WEBSITE PROBLEMS WE HELP SOLVE

# Common issues that can hold back organic performance

Not every website has every problem. We confirm what is actually affecting your site through an audit, then prioritise the fixes that matter most.

**01 Indexing problems**
Pages not indexed, or indexed incorrectly.

**02 Poor keyword targeting**
Pages aimed at terms customers don't use.

**03 Weak titles & meta descriptions**
Unclear snippets that reduce clicks.

**04 Duplicate or thin content**
Pages that offer little unique value.

**05 Poor internal linking**
Important pages are hard to discover.

**06 Technical SEO errors**
Broken links, redirects and crawl issues.

**07 Slow or difficult mobile experience**
Speed and usability friction.

**08 Missing or incorrect schema**
Details harder for search engines to read.

**09 Weak backlink profile**
Few relevant, trustworthy references.

**10 Poor topical authority**
Shallow coverage of key subjects.

**11 Content that misses the query**
Doesn't fully answer what users ask.

**12 Limited AI search visibility**
Brand details hard for AI to interpret.

**13 Competitors outperforming key pages**
Rivals ranking for your priority terms.

**Audit first, assumptions never.**

Our website SEO audit separates confirmed issues from hypothetical ones, so effort goes where it can genuinely make a difference to your visibility.

OUR INTEGRATED STRATEGY

# SEO + AEO + GEO + AIO: four complementary layers

## SEO
Search Engine Optimization

WHAT WE DO

- Keyword research and page mapping
- Technical SEO, crawlability and indexability
- On-page optimization
- Internal linking
- Content improvements
- Backlink acquisition
- Ranking monitoring

GOAL

Improve relevant organic search visibility and help target pages compete for appropriate search queries.

## AEO
Answer Engine Optimization

WHAT WE DO

- Question-based headings
- Concise, direct answers
- FAQs where appropriate
- Structured, scannable content
- Entity clarity
- Relevant schema markup

GOAL

Make website information easier for search engines and answer-oriented experiences to interpret and potentially surface.

## GEO
Generative Engine Optimization

WHAT WE DO

- Clear, consistent brand information
- Factual, useful content
- Broad topical coverage
- Entity consistency across sources
- Trustworthy references
- Discoverability on relevant sources

GOAL

Improve the chances that relevant brand information is understood, discovered and potentially referenced by generative AI search.

## AIO
AI Search & Content Optimization

WHAT WE DO

- AI-assisted research
- Content gap analysis
- Search-intent mapping
- Semantic optimization
- Content quality checks
- Human review of all output

GOAL

Make content useful, accurate, well-organized and easier for modern search systems to interpret.

### Complementary, not competing.

SEO builds the foundation. AEO, GEO and AIO extend it to answer-led and AI-led search. We apply them together because strong technical health, useful content and clear brand information help every channel.

### A realistic expectation

No single method — including FAQ schema, an llms.txt file or AI-assisted content — guarantees rankings or inclusion in Google AI Overviews, ChatGPT or other AI platforms. Schema helps systems interpret information but does not guarantee rich results.

OUR STEP-BY-STEP WORKING PROCESS

# From discovery to continuous improvement in ten steps

**1**

### Discovery & business understanding

Your industry, services, target audience, locations, objectives and competitors.

**2**

### Complete website SEO audit

Crawlability, indexability, status codes, redirects, sitemap, robots.txt, canonicals, mobile, speed, duplicates, schema and internal links.

**3**

### Keyword research & search intent

Primary, secondary, long-tail, commercial, informational and local keywords, assessed for intent, competition and relevance.

**4**

### Competitor analysis

Competing sites, ranking pages, content gaps, keyword opportunities, backlink profiles and topical coverage.

**5**

### SEO roadmap & prioritization

An actionable plan: critical fixes, high-value pages, quick improvements, content and long-term growth.

**6**

### On-page & technical optimization

Titles, meta descriptions, headings, content, URLs where appropriate, alt text, internal links, canonicals and schema.

**7**

### Content, AEO, GEO & AIO

Improve existing content, add new content where suitable, answer user questions clearly and keep facts accurate.

**8**

### Off-page & authority building

Relevant backlinks through quality content, legitimate outreach and guest contributions. No spam or link schemes.

**9**

### Ranking & performance monitoring

Keywords, clicks, impressions, CTR, landing pages, indexing, backlinks and conversions where tracking is reliable.

**10**

### Reporting & continuous improvement

Weekly ranking updates and work reports, a monthly consolidated report, and strategy adjustments from the findings.

*Implementation depends on the selected package, website access, content requirements and the agreed scope. Where access or coding is required, we coordinate with you or your developer.*

OUR SEARCH RANKING IMPROVEMENT FRAMEWORK

# A simple, data-led loop we apply to every project

Clear steps, in plain language — each informed by your audit, your competitors and your actual search data.

1. Select keywords relevant to your services and business goals.
2. Map target keywords to the most appropriate website pages.
3. Identify why competing pages may be performing better.
4. Fix confirmed technical and indexing problems.
5. Improve content relevance, search-intent coverage and on-page elements.
6. Strengthen internal linking and related-topic coverage.
7. Build relevant, editorially appropriate backlinks and brand references.
8. Improve user experience and conversion paths where needed.
9. Track keyword movement and Google Search Console performance.
10. Refine the strategy based on actual data.

**ILLUSTRATIVE EXAMPLE**

Target keyword

**“Premium Home and Kitchen Products”**

| | |
|---|---|
| Page | A relevant category page |
| Title tag | Descriptive, with the keyword used naturally |
| H1 | Premium Home and Kitchen Products |
| Subtopics | Cookware, storage, kitchen tools, buying guide |
| Content | Helpful category copy and clear product information |
| Internal links | From the homepage, related categories and guides |
| Schema | Breadcrumb / product markup where applicable |

*Illustration of the method only — not a result achieved for any actual client.*

### What influences rankings — and what we won’t promise

Rankings depend on competition, search intent, website quality, historical authority, algorithm changes and many other factors outside any agency’s control. For that reason, JPS Digital Solutions never promises guaranteed first-page rankings or a fixed ranking timeline. We commit to doing the right work, measuring it honestly and adjusting based on what the data shows.

OUR PAST CLIENT EXPERIENCE

# Businesses We've Worked With

A selection of the businesses and websites we've worked with is shown below.

MI

**miguestpost.com — G Madam**

AA

**aapkakishan.com**

CH

**Chandar Home Collection**

HI

**hireandclean.co.nz**

KD

**Kiyana Diamonds**

NU

**SPP Silks**

TR

**Trisatva.in**

### Project details, shared responsibly

Specific project details, deliverables and results can be shared where available and authorized by the client. Client names are shown as text; official logos and case studies can be added with permission.

GOOGLE BUSINESS PROFILE (GMB) SERVICES

# Local visibility that helps nearby customers find and trust you

A well-managed Google Business Profile makes it easier for people searching on Google Search and Maps to find accurate information about your business and contact you.

01

### Profile setup & verification support

Claim, create or recover your listing and complete verification.

02

### Profile optimization

Consistent business name, categories, services, description, hours and attributes.

03

### Local keyword & category strategy

Relevant services and locations reflected naturally in your profile.

04

### Photos & posts

Regular updates, offers and photos that keep your profile active and informative.

05

### Review collection

Review links and request messages that help real customers share feedback.

06

### Review responses

Professional replies to positive and critical reviews alike.

07

### Citations & NAP consistency

Accurate name, address and phone details across relevant directories.

08

### Insights & reporting

Profile views, calls, direction requests and website clicks, where available.

HOW A GMB ENGAGEMENT WORKS

**1 Profile audit**
Review listing, categories, details and competitors

**2 Optimization**
Complete and align profile information

**3 Activity & reviews**
Posts, photos, review requests and replies

**4 Reporting**
Progress summary and next-step recommendations

### What influences local visibility

Local results depend on relevance, distance and prominence, along with competition and Google's own policies. We cannot guarantee Google Maps or local-pack rankings. Reviews must always come from genuine customers.

GOOGLE BUSINESS PROFILE

# GMB review pricing and past GMB clients

GMB REVIEW SERVICE

**₹65** per review

- Review request messages, links and QR support for your Google Business Profile.
- Coordination with your genuine customers to share their real experiences.
- Charged per genuine review received on your profile.
- Reviews come only from real customers of your business — never fake or incentivized reviews, in line with Google's policies.

*Profile setup, optimization and ongoing GMB management scope and pricing are agreed after a profile review.*

OUR PAST GMB CLIENTS

| | | |
|---|---|---|

- Complete monthly work report.
- 2 articles for off-page link-building activities.
- Competitor analysis.
- Target submission websites with DA 30+ where suitable.

PACKAGE 3

## PREMIUM

For businesses seeking broader SEO coverage, more extensive content support and stronger authority-building.

**$165** per month

**or ₹16,000 per month**

- 20 target keywords.
- 12+ target pages.
- 200 quality backlinks, subject to relevance, quality, and suitability.
- Website SEO audit.
- On-page optimization according to finalized keywords.
- Off-page SEO activities.
- Weekly ranking report.
- Weekly work report.
- Complete monthly work report.
- 4–5 articles for off-page link-building activities.
- Target submission websites with DA 40+ where suitable.
- 5 guest-post backlinks, subject to publisher acceptance and editorial relevance.
- Competitor analysis.
- Backlink profile analysis and opportunities.

**Please note:** USD and INR figures are the alternative price indications supplied by JPS Digital Solutions, not live currency conversions. Taxes, third-party publishing fees, premium placements, paid tools and additional development costs, if applicable, are agreed separately. Exact scope and backlink types are agreed before work starts. Backlink counts are planned deliverables; DA is a third-party metric, not a Google ranking score, and no package guarantees specific authority scores, rankings or results.

DELIVERABLES, REPORTING AND TRANSPARENCY

# What you receive during the engagement

Clear outputs at every stage, so you always know what has been done and what comes next.

- Initial website audit and prioritized recommendations
- Finalized keyword and target-page mapping
- On-page optimization work
- Off-page SEO activity summaries
- Weekly keyword ranking updates
- Weekly work progress reports
- Monthly consolidated SEO report
- Competitor and backlink analysis, per selected package
- Recommendations for the next optimization cycle

OUR REPORTING RHYTHM

### Weekly

Keyword ranking update and work progress report.

### Monthly

Consolidated SEO report covering work completed, performance data and findings.

### Every cycle

Recommendations for the next round of optimization, based on the data.

### Completed tasks

What we did: audits completed, pages optimized, content improved, links pursued and issues fixed.

*Reports may include Google Search Console and analytics data once you grant access and tracking is configured.*

### Measured outcomes

What the data shows: rankings, clicks, impressions, click-through rate and conversions.

*We report actual results only when they are supported by reliable data — never estimates presented as facts.*

WHY CHOOSE JPS DIGITAL SOLUTIONS?

# A practical, transparent approach to search growth

01

### Structured, transparent workflow

A defined process from audit to reporting, so you always know the next step.

02

### Strategy tailored to your goals

Plans built around your business, audience and priorities — not a template.

03

### SEO + AEO + GEO + AI-assisted

Traditional SEO integrated with answer and generative search optimization.

04

### Useful content, relevant intent

Content written to help real users and match what they search for.

05

### Quality-focused link building

Relevant, legitimate placements — no spam, no link farms.

06

### Regular communication

Weekly reports and a monthly summary keep you informed.

07

### Data-based recommendations

Practical next steps grounded in your website data.

08

### Worldwide service

Remote collaboration with businesses in any market.

## Our commitments to you

- **Honest expectations** — No guaranteed rankings, traffic or AI citations.
- **Ethical practices** — No link farms, keyword stuffing or manipulative tactics.
- **Real results only** — No invented statistics, testimonials or outcomes.
